

YIT Platform

P. Leinonen

6.2.2025

YIT Platform is a key vehicle to realise YIT's strategic targets

YIT Platform to enable business transformation to a process driven organization to increase productivity

A scalable, adaptable, and secure YIT Platform to support growth, resilience, and business continuity

Emergent technologies to enable best customer experience and elevate end-user experience

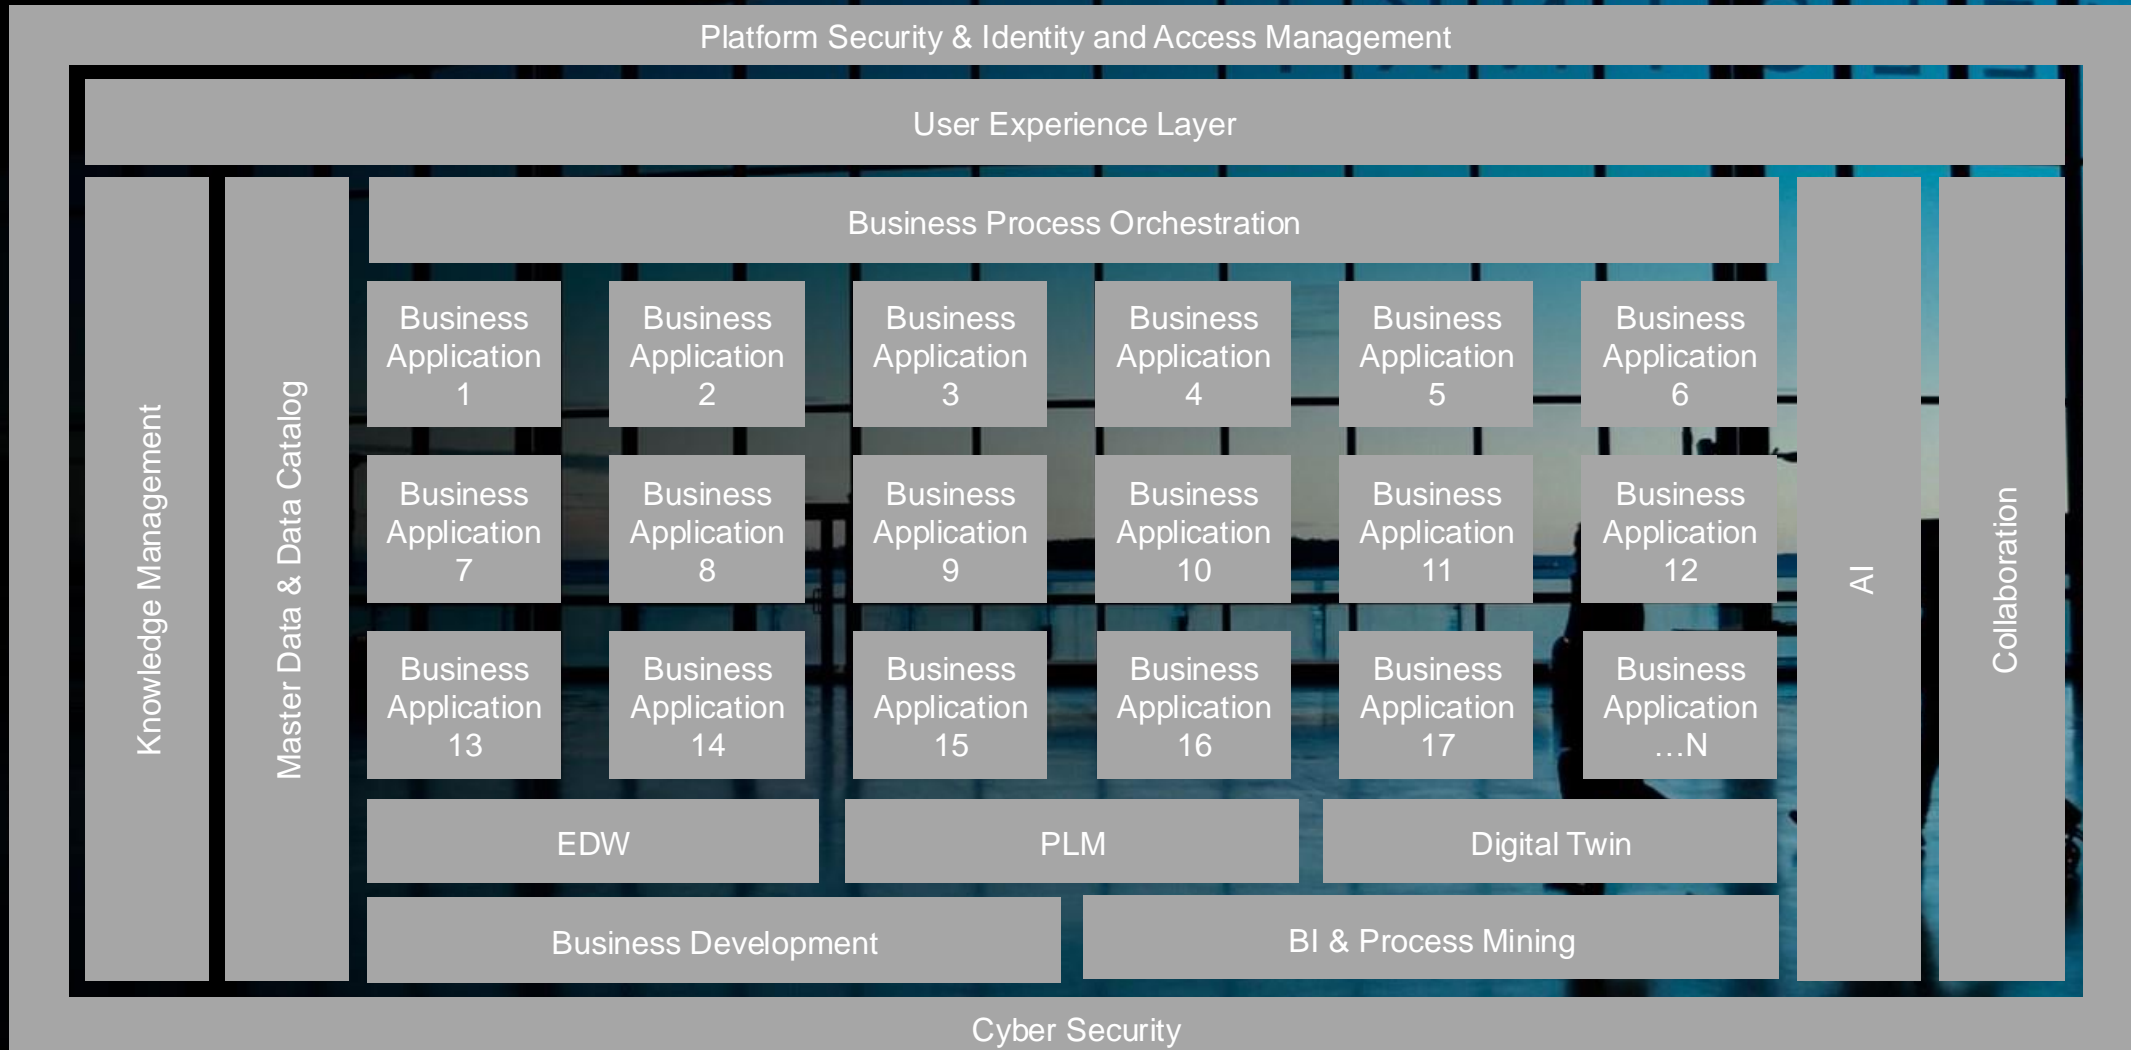

- The current ways-of-working is more project driven with many variants how to do the work. The guidance how to do the work is not process driven but on task level what to do before each decision gate.
- Solutions haven been built for a single capability or business function purpose
- Data flows between business applications are manual, semi-manual or implemented case-by-case by BT without any end-to-end process view nor comprehensive data definitions
- Employee experience is not consistent and not defined based on a holistic service design

YIT Platform Vision 2029

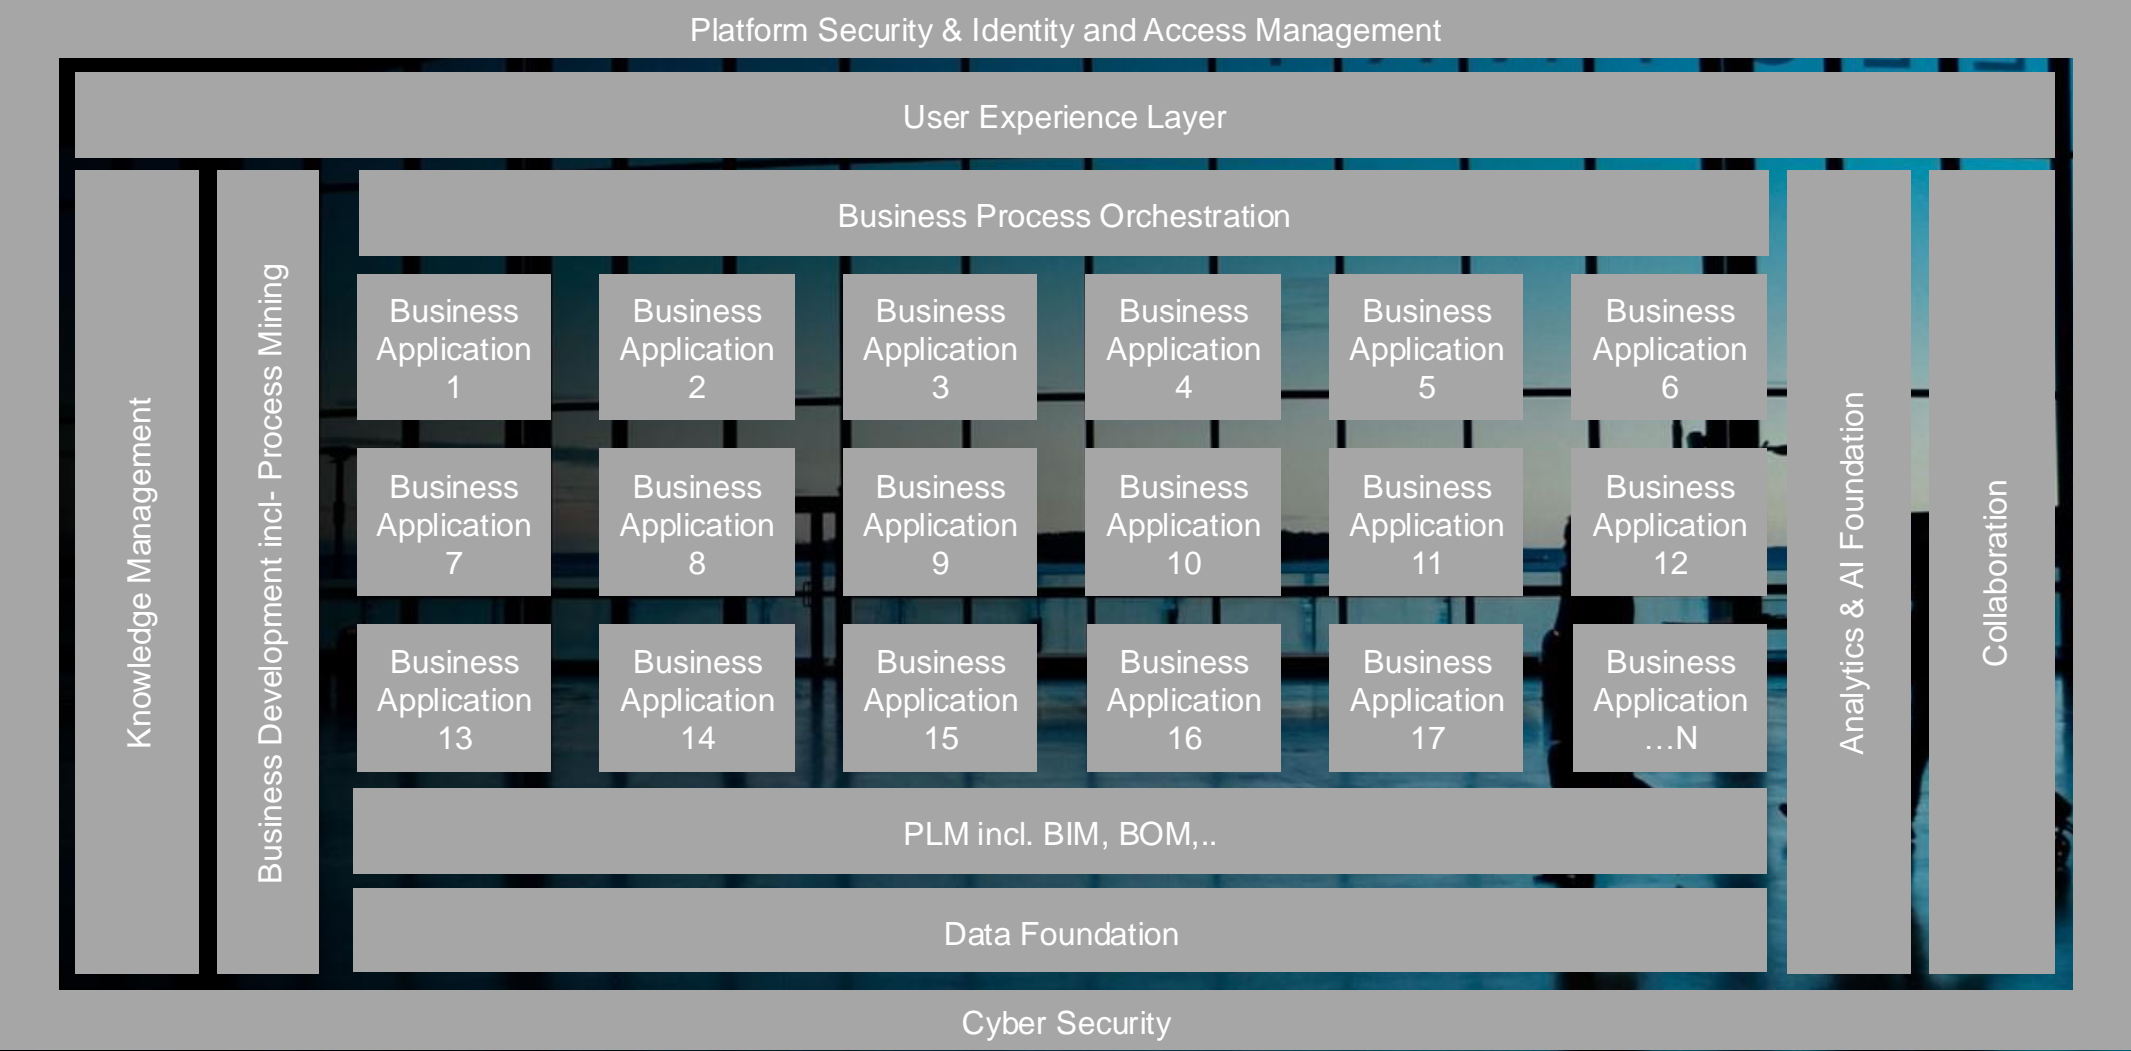

- YIT Platform to enable automated process, data and AI driven organization to increase productivity
- YIT Platform
 - Is a collection of multiple interoperable solutions and technology platforms
 - Automates end-to-end business processes and respective data flows by an orchestration and integration platform
 - Enables continuous process monitoring and enhancements through process mining and design
 - Elevates employee experience with context aware user interface, user experience and AI guided workflows
 - Enables collective digital knowledge by shared data as a core of the platform
 - Ensures business continuity and protects valuable assets with a robust cybersecurity
 - Is scalable and adaptable for changes in business

Initial Roadmap for 2025 of YIT Platform Epic

Legend:

EA leads

2025	2026		2027	2028	2029
Define architecture and roadmap for YIT Platform and select the key technologies	Develop and implement MVP	Implement business processes in the YIT Platform based on the prioritization and automate their data flows			
		Automate data flows for end-to-end processes			
Develop data platform for new analytics and insight development	Create insight for the business from the data available on the platform				
Implement the prioritized AI enablement and solutions					
Create a plan for AI and platform security with zero trust and built-in features	Implement the plan				
Create a plan for moving core technology services to the cloud and on-premise systems elimination	Implement the plan				
Create a plan and a model how cloud capacity and cloud native IT services will be provided					
Define architecture framework to cover human aspect i.e. end user journey and needs	Service design, business development and technology forms cross-functional teams to develop customer facing solutions BAU				
Derive needed skill from the YIT Platform architecture and the selected technologies	Train all white-collar employees as planned

Business Technology 2025-2029

"YIT Platform to enable automated process, data and AI driven organization to increase productivity"

Must-win battle focus timeline

Business Technology strategy 2025–2029:

”Business process, data and AI driven company enabled by YIT platform”

Strategic choices

Deliver industry-leading **PRODUCTIVITY** and **FINANCIAL PERFORMANCE**

Create YIT Platform to enable business transformation to a process driven organization to increase productivity

- YIT Platform powered by AI is defined and implemented, its technology selections and development is led by holistic demand and portfolio management, and driven by business process development
- Data flow for all YIT Platform solutions is automated as defined by the related end-to-end process
- Data is collected automatically through out the end-to-end processes and insight created for business management and development, as well as for cumulative knowledge base

Effective, scalable, optimized and transparent Business Technology operating model for business growth and transformation

- IT cost transparency is defined per processes and process performance is measured

- Operational fixed BT costs don't exceed 1,4% from the turnover

20 18/12/2024 Business Technology Strategy 2025-2029

Generate targeted **GROWTH** and **RESILIENCE**

Create a scalable, adaptable, and secure YIT Platform to support growth, resilience, and business continuity

- AI and platform security ensured with zero trust and built-in features
- The core of the YIT Platform will be provided from cloud data centers closer to business locations to ensure continuity, and reliance on on-premise systems eliminated.

Forecasted business demand drives scalable workforce, competences and resources flexible available for business and technology development

- Resource planning as a part of the demand forecasting and portfolio management process (rolling 3 yrs/1 yr /90 days planning) and a flexible sourcing model and vendor pool for scalable workforce

TBD

Elevate **CUSTOMER** and **EMPLOYEE** experience

Introduce emergent technologies to enable best customer and elevate end-user experience

- Service design, business development and technology forms cross-functional teams to develop customer facing solutions ensuring the best customer experience
- Cross-functional teams and continuous service improvement to develop business solutions and to elevate end-user experience

YIT personnel has capabilities to utilize data and technologies in everyday work

- Data and technology academy as part of YIT Academy in place and all white-collar employees trained and utilizing the skills

Engage employees with strong leadership

- Personal goals based on the strategy and team goals. Each individual and the team understand how they contribute to the overall strategy
- Foster trust and accountability to drive strategic success.

- IT solutions and services experience index from 3.7 to 4.3
- IT service ticket resolution NPS from 71 to 80
- eNPS from 32 to 50
- Engagement index from 4.0 to 4.3

Strategy 2025-2029 executive summary | PROCESSES powered by TECHNOLOGY

Strategic Objectives and Key Results 2025-2029 (Prio 1) | Business Technology

STRATEGIC THEME	PRIORITY OBJECTIVE		KEY RESULT		DEADLINE	OWNER
Deliver industry-leading PRODUCTIVITY and FINANCIAL PERFORMANCE	Create YIT Platform to enable business transformation to a process driven organization to increase productivity		YIT Platform powered by AI is defined and implemented, its technology selections and development is led by holistic demand and portfolio management, and driven by business process development		2029	P. Leinonen
			Data flow for all YIT Platform solutions is automated as defined by the related end-to-end process		2029	H. Hamunen
			Data is collected automatically through out the end-to-end processes and insight created for business management and development, as well as for cumulative knowledge base		2029	O. Järvi
	Effective, scalable, optimized and transparent Business Technology operating model for business growth and transformation		Operational fixed BT costs don't exceed 1,4% from the turnover (current 1,37%)		2025-2029	E. Nykänen
			IT cost transparency is defined per processes and process performance is measured		2027	J. Uusitalo
Generate selected GROWTH and RESILIENCE	Create a scalable, adaptable, and secure YIT Platform to support growth, resilience, and business continuity		AI and platform security ensured with zero trust and built-in features		2026	J. Rautpalo
			The core of the YIT Platform will be provided from cloud data centers closer to business locations to ensure continuity, and reliance on on-premise systems eliminated.		2028	J. Väänttinen
	Forecasted business demand drives scalable workforce, competences and resources flexible available for business and technology development		Resource planning as a part of the demand forecasting and portfolio management process (rolling 3 yrs/1 yr /90 days planning) and a flexible sourcing model and vendor pool for scalable workforce		2026	P. Leinonen
Elevate CUSTOMER and EMPLOYEE experience	Introduce emergent technologies to enable best customer experience		Service design, business development and technology forms cross-functional teams to develop customer facing solutions ensuring the best customer experience		2026	E. Nykänen
	Elevate end-user experience		IT solutions of YIT Platform and IT services experience index from 3.7 → 4.3		2029	E. Nykänen
			End-user IT service ticket resolution NPS from 67 → 80		2029	E. Nykänen
	YIT personnel has capabilities to utilize data and technologies in everyday work		Data and technology academy as part of YIT Academy in place and all white-collar employees learned		2027	O. Järvi
	Engage employees with strong leadership		eNPS from 32 → 50		2029	E. Nykänen
			Service design, business development and technology forms cross-functional teams to develop and automate business processes ensuring the best employee experience: engagement index from 4.0 → 4.3		2026	E. Nykänen
STRATEGIC ENABLERS	Lean PROCESSES powered by TECHNOLOGY to boost continuous improvement	Construction and development CAPABILITIES to excel in demanding projects	CAPITAL EFFICIENCY amplifying growth and stability	Strong customer-focused YIT CULTURE creating a trusted brand	Committed to SUSTAINABILITY and QUALITY in everything we do	

Annual Plan for 2025 executive summary | PROCESSES powered by TECHNOLOGY

Strategic Objectives and Key Results 2025 (Prio 1) | Business Technology

1st DRAFT
Noy discussed in BT Mgmt Team

STRATEGIC THEME	PRIORITY OBJECTIVE	KEY RESULT	DEADLINE	OWNER
Deliver industry-leading PRODUCTIVITY and FINANCIAL PERFORMANCE	Create YIT Platform to enable business transformation to a process driven organization to increase productivity	Architecture and roadmap for YIT Platform is defined and the key technologies selected	2025	P. Leinonen
		An operating model for holistic demand and portfolio management and business process driven development is defined	2025	P. Leinonen
		AI Steering Group operational and the prioritized identified opportunities for AI development done.	2025	O. Järvi
		Data domains and respective owners are agreed and synced with YIT Processes Data Platform enables self-service analytics and report catalog will raise analytics knowledge	2025	O. Järvi
	Effective, scalable, optimized and transparent Business Technology operating model for business growth and transformation	Operational fixed BT costs doesn't exceed 1,3% from the turnover (current 1,37%)	2025	E. Nykänen
		IT cost transparency is defined per MVP processes and process performance is measured	2025	J. Uusitalo
Generate selected GROWTH and RESILIENCE	Create a scalable, adaptable, and secure YIT Platform to support growth, resilience, and business continuity	A plan for AI and platform security with zero trust and built-in features created	2025	J. Rautpalo
		A plan for moving core technology services to the cloud and on-premise systems elimination	2025	J. Vanttinen
		A plan and a model how cloud capacity and cloud native IT services will be provided	2025	J. Vanttinen
	Forecasted business demand drives scalable workforce, competences and resources flexible available for business and technology development	Resource planning as a part of the demand management process (rolling 3 yrs/1 yr /90 days planning) defined	2025	P. Leinonen
		Flexible sourcing model and vendor pool for scalable workforce in place	2025	J. Järvelä
Elevate CUSTOMER and EMPLOYEE experience	Introduce emergent technologies to enable best customer experience	Architecture framework extended to cover human aspect i.e. end user journey and needs	2025	P. Leinonen
		Operating model for cross-functional teams started	2025	H. Hamunen
	Elevate end-user experience	IT solutions and services experience index from 3.7 → 3.8	2025	E. Nykänen
		End-user service ticket resolution NPS from 67 → 72	2025	J. Vanttinen
		YIT personnel has capabilities to utilize data and technologies in everyday work	2025	O. Järvi
	Engage employees with strong leadership	Needed skills derived from the YIT Platform architecture and the selected technologies	2025	P. Leinonen
		eNPS 32 → 37	2025	E. Nykänen
		Operating model for cross-functional teams started: engagement index 4.0 → 4.1	2025	H. Hamunen
